The basic potting (seed starting) mix:

For a measure we use a two pound coffee can.

- 1 - 2 cu. ft. bag of pine bark, double ground and composted (AKA: soil conditioner, pine bark fines, Nature's Helper (TM))
- 2 cans perlite, medium
- 1 can peat
- 1/4 cup dolomitic lime (not high calcium lime and not peletized)
- 1/4 cup agricultural gypsum
- 1/4 cup Peters 20-20-20 or some other water soluble "complete" fertilizer
- 1/8 cup Epsom salts
- 2 Tablespoons Sulfur
- 1 1/3 cup Merit granular (for control of fungus gnats) **Optional

Mix well (dry) in a wheel barrow, then wet and mix thoroughly again.
